Digital Revolution and 3D Printing in Nursing Education

Digital revolution reshapes human experience with increasing speed. This technological evolution permeates numerous industries and areas, enhancing the convenience and simplicity of daily life. Notably, the positive impact of technology has become indispensable in healthcare, where various innovations contribute to successful patient outcomes. Among these advancements, three-dimensional (3D) printing stands out as a groundbreaking technology, providing substantial benefits not only in medicine but also in the educational sphere, particularly for nursing students. Revolutionizing Nursing Education 3D printing, often viewed as […]
